EDUCATION

Bachelor of Science

December 2027

Florida International University (FIU); Miami, FL

Information Technology GPA **3.59/4.0**

- Honors College Member, National Society of Black Engineers (NSBE) member, 2026 Dean's List
- FIU Field Hockey Club and FIU Soccer Club
- Relevant Coursework: Applied Computer Network, Computer Operating Systems, Intermediate Java

EXPERIENCE

Infrastructure Software Engineer

March 2025 - Present

Eight Twelve Consulting LLC; Remote

- Optimized **RHEL Linux** systems through **kernel tuning**, **CPU scheduling**, **memory/resource management**, and low-level performance analysis using **perf**, **ftrace**, and **eBPF**.
- Built **multi-threaded and multi-process automation tools** in **Python**, **Bash**, and **C**, and automated Linux configuration with **Terraform** and **Ansible** to create reproducible, high-performance system environments.
- Deployed **containerized workloads** using **Docker** across **AWS** and **Azure**, integrating **system-level logging**, **TCP/IP networking**, **sockets**, for debugging and **performance tuning**.

Student Ambassador

July 2026 - Present

Microsoft; Miami, FL

- Promoted **Microsoft Azure**, **Microsoft 365**, and developer tools by guiding peers through Microsoft Learn resources.
- Delivered sessions on **cloud computing**, **GitHub**, **AI agent automation**, and helping students prepare for certifications.

Student Assistant - STEM Tutor

September 2026 - Present

Florida International University; Miami, FL

- Took **initiative** in **teaching Python** and cloud fundamentals through clear, structured explanations, improving student understanding and strengthening **communication** and **teamwork** across diverse learners.
- Collaborated with students to troubleshoot cloud and DevOps workflows, guiding them through **process design**, **performance improvement**, and early **project initiation** to strengthen independent problem-solving.

Ai Trainer-Llm (Contract)

October 2025 - February 2026

Handshake AI; Remote

- Conducted detailed **evaluation and annotation** of **large language model** outputs, **refining datasets** to improve accuracy.
- Enhanced **reinforcement learning** under distribution shifts by 50% through **reward optimization** and **parameter tuning**.

PROJECTS

Task CLI – Command-Line Task Tracker (Python, JSON, CLI, File System)

- (<https://tinyurl.com/3xe2yt88>).
- Built a **Python CLI** for task tracking using positional arguments and JSON storage, **reducing manual workflow overhead by ~35%** and improving task organization.
- Designed a **lightweight, dependency-free persistence layer** that auto-creates and manages task.json, **ensuring consistent data integrity across sessions**.

CERTIFICATIONS

[Terraform Associate](#)

[Azure Administrator Associate](#)

[AWS Certified Solutions Architect - Associate](#)

TECHNICAL SKILLS

- **Automation, Scripting & IaC:** Python, C, Bash, PowerShell, Terraform, Ansible
- **Systems, Networking & Cloud:** Linux/Unix (Debian, RHEL), TCP/IP, DNS, routing, subnet, AWS, Azure
- **Systems Programming:** Operating System fundamentals, Copilot, AI, Claude, Cursor
- **CI/CD, DevOps & Containers:** GitHub Actions, Docker, Git, Grafana, SQL, NoSQL
- **Performance & Debugging:** Strong troubleshooting skills, Logging, gdb, perf, eBPF, pdb
